High Security Railway Switch/Signal Padlocks

- Used for all railway applications with several models available including colored body sleeves with logos.
- Patent protected keys – Keys require special equipment to be duplicated at our USA factory.
- Patented rotating disc cylinder- virtually pick proof, bump proof, **ABLOY® Sentry** or **Protec²** – no springs to wear, jam or freeze.
- Environmentally resistant – resists harsh environments
- Key retaining – key can only be removed when padlock is locked
- Millions of unique codes - **Unlike other padlock companies, we do not duplicate codes** – your codes are unique to you and will never be duplicated.
- Logos and phrases such as "MOW", "SIGNAL", and company logos can be permanently etched on the padlock body.
- The all-metal keys can be stamped and serialized along with color coding
- Assembled in the USA – quick turnaround on all products

*) = not tested CHBS = case-hardened boron steel

OPTIONAL ITEMS:

ATTACHMENT CHAIN

(length 220 mm) makes it easier to ensure that a padlock does not get mislaid while the object that it secures is open. These chains must not be used as part of a security installation.

Riveted Chain attachment also available!
