REMANUFACTURED & NEW EMD & GE FUEL PRE-HEATERS

The Remanufacturing Process:

EMD Fuel Pre-Heaters

P/N's: 9517269 & 9333522

GE Fuel Pre-Heaters

P/N's: 41C619684P2 &
41C640369G1

- ◆ Fuel pre-heaters are remanufactured by first cleaning the outside, flushing the internal passages, and visually inspecting the unit for leaks while applying pressure to the core.
- ◆ All identified leaking tubes are mechanically sealed. If the number of sealed tubes exceeds the OEM standard for the maximum allowable number of sealed tubes, a replacement center section is offered in the remanufacturing process.
- ◆ Upon completion of core testing, a final pressure check of the assembly is completed.
- ◆ The fuel pre-heater is then completely dried, painted, wrapped and skidded for shipment
